

DIXON SAND (PENRITH) PTY LTD

To whom it may concern,

Dixon Sand (Penrith) P/L operates in the Maroota area of NSW. We process Hawkesbury friable sandstone and Maroota tertiary sand.

This process is carried out through excavation of the raw materials with the use of bulldozers and excavators. The excavated material is then processed through a crushing, screening and washing plant.

All of our products which we produce for sale to the marketplace consist of Virgin Excavated Natural Materials (VENM), free of industrial, commercial waste and manufactured chemicals.

Our products comply with the EPA Appendix 15 definitions, referred to in Item 1 in Part 2 of Section 2 of the Guide to Licensing - Part B.

DAVID DIXON
